CAREER OBJECTIVE

Recent Business Analytics graduate with a strong foundation in data analysis, statistical modeling, and business intelligence tools. Completed numerous practical courses in Python, SQL, Power BI, and data storytelling, along with hands-on experience in projects and national programming competitions such as ECPC. Adept at transforming raw data into actionable insights through dashboards and visual reports. Seeking a Data Analyst or Junior Data Scientist role where I can apply my skills, continue learning, and contribute to data-driven decision-making in a dynamic business environment.

EDUCATION

CGPA 2.82

Egyptian Russian University

Business Analytics in college of Economics, Management & Business Technology

09/2021 – 06/2025

Cairo, Egypt

Secondary | El Tabary International School , Roxi

09/2018 – 06/2021

EXPERIENCE

Vodafone | Cloud Native Intern

09/2024 – 09/2024

- Learned to use OpenShift for managing containerized applications.
- Worked with Linux to support cloud systems.
- Gained experience with Containers (like Docker) to help deploy and manage apps.
- Got familiar with Virtual Machines (like VMware) and how they compare to containers.
- Learned some basics of Data Science in cloud environments.

Business Intelligence (BI) Intern, ACT

08/2023 – 09/2023

- Worked with the BI team on different projects, improving my skills in Data Analysis and Reporting.
- Learned how to work well in a team and manage tasks under pressure.
- Improved my communication and time management through real-world experience.
- Helped the team make better decisions by providing useful data and reports.

Training Experience at EgyptAir - Financial Analysis in Airline Industry

07/2024 – 08/2024

- Learned about finance in the airline industry and how the company operates.
- Used SAP software to Analyze Financial data and help with decision-making.
- Improved my skills in problem-solving, communication, and teamwork by working on real tasks.
- Gained experience working under pressure and learned how to work in a business environment

Manager, Entrepreneurship Club

2022 – 2023

Egyptian Russian University (ERU)

- Managed the club's activities and helped organize events that promoted entrepreneurship among students.
- Worked as a photographer and video editor to create visual content for the club's events and social media.
- Planned and executed marketing strategies to increase student engagement and participation.
- Contributed to the creative process by developing innovative ideas for campaigns and club initiatives.

University Youth Parliament Member

2023 – present

Egyptian Russian University (ERU)

- Represented students in discussions about important university topics.
- Worked with other members to suggest ways to improve student life.
- Gained skills in public speaking, teamwork, and problem-solving.
- Helped organize events to encourage more students to get involved.

Participant, Egyptian Collegiate Programming Contest (ECPC)

- Placed 64th in Egypt and 2nd within the university.
- Solved multiple complex programming problems using C++.
- Developed strong problem-solving and teamwork skills by working under pressure to meet deadlines.

PROJECTS

Automated Resume Classification Using Machine Learning and Deep Learning by Python [↗](#)

This project aimed to automate resume classification using Python-based machine learning and deep learning techniques. A team of four students developed a system that preprocesses resume text, extracts features with TF-IDF, and classifies resumes using models like SVM, Random Forest, and Bi-LSTM, achieving 92% accuracy. The final product was deployed as a Streamlit web app for real-time job role prediction, improving efficiency in recruitment screening.

Analysis on The National Health and Nutrition Examination Survey (NHANES) II by Python [↗](#)

This project was collaboratively undertaken by a group of five students,, where we employed Python programming to conduct comprehensive analyses on the data from The National Health and Nutrition Examination Survey (NHANES) II. Subsequently

Analysis Pregnancy data by Python [↗](#)

This project was completed by team of five students. We employed Python to conduct in-depth analysis on pregnancy data, subsequently developing interactive dashboards to visualize our findings

Dashboard. [↗](#)
